Specialized services for the

Pipeline Industry

■ Safety First!

MERSINO recognizes the importance of compliance with safety regulations. Our own dedication to training and record keeping give you one more reason to be confident our field staff will get the job done, and done safely.

One-Pass Trenching

MERSINO has invested in highly precise equipment to perform one-pass trenching services. We utilize laser guides and GPS systems for accurate installation along irregular grades for maximum efficiency.

Effective for installing environmentally sensitive services including sock tile dewatering.

Dewatering Specialists

The impact of ground water on a pipeline project can be enormous. A dry, safe work site is needed, there is no better company to call than MERSINO. We offer a broad range of cost-effective dewatering solutions including:

- Deep well drilling
- Wellpoint dewatering
- Sock tile trenching
- Eductor system dewatering
- Slurry walls

We thrive on the challenges presented by each job. Selecting and engineering the best solution for your needs is our expertise. Put our experience to work for you.

Drilling Services

Our expertise in specialized well drilling includes:

- Deep well dewatering
- Relief wells for artesian pressures
- H-pile and caisson installation
- Reverse circulation drilling
- Monitoring wells
- Test drilling

HDPE Pipe and Fusion

Our technicians have fused hundreds of miles of HDPE pipe ranging from 6" to 36". We stay current with the latest equipment and technology so you can be assured the pipe is installed correctly.

Power Generation

We have a large, national fleet of fully-enclosed, sound attenuated, portable generators ranging from 10 kW to 2000 kW.

Often, emergency events are the reason for power generation needs. MERSINO is on call 24/7/365 to respond to any situation. Our crews are well trained to quickly handle your power generation needs. We also offer power accessories and electrical distribution gear.

Pumping Services

MERSINO offers unparalleled pumping services. We have engineering and practical experience designing and implementing pipeline pumping projects of all sizes. Our field experience assures that each job will be done properly.

We exclusively use pumps through our manufacturer, Global Pump. The highly efficient, electric or diesel driven pumps are available in a variety of sizes and configurations to meet your specific requirements.

Trained technicians and fully stocked service trucks are available at all times to manage pumping systems.

Other Services

Extensive experience in other services including:

- Pump and treat
- Pressure line filling
- Pig pushing for cleaning and inspection
- Frac tank transfer for removing contaminants for safe discharge

Accessories

Available accessories to purchase or rent include:

- Global QD galvanized pipe and fittings 2"-12"
- HDPE pipe, hose and fittings 6"-36"
- Sewer plugs
- Road ramps
- Fuel cells
- Light towers
- Small portable pumps & generators
- Spill containment berms
